MYSQL tables

Structure of main table (which basically dumps the content of Excel files) :
- run_id (unsigned integer(10))
- rental_unit_id (unsigned integer(10))
- columns from excel file (named with underscores)

Each time you run the program you generate a "run" - entry in the run table:
RunTable
- run_id unsigned integer(10)
- run_time date

Emails are sent according to configuration table:

MessageRecipients
- message_recipient_id
- name varchar(500)
- email varchar(500)

Notes
- note_id
- note varchar(500)
